Dear Dennis:

I currently work with the Los Angeles Police Department.

I've witnessed the amount of data law enforcement agencies process from real-time videos, online digital media and hardcopy photographs continuing to grow at a rapid rate. Now, with NEC's NeoFace® WideNet, multiple agencies can share their mugshots and benefit from NEC's powerful NeoFace Facial Recognition – the industry's fastest and most accurate face matching algorithm.

The key advantage for criminal investigators is the rapid processing of facial evidence combined with the ability to quickly generate a list of investigative leads. NeoFace WideNet-hosted service saves valuable time in cases with photographic and video evidence, which in turn reduces the investigator's caseload.

Questions? Let's chat or feel free to call or reply to this email. I look forward to speaking to you soon.

Best regards,

Kelly Gallagher
Sr. Account Manager, NEC Advanced Recognition Systems
